

***EASY SLOT RACE MANAGEMENT***

***GET STARTED***

To start, if you want to use custom drivers (with image, specific parameters etc.), you have to create them. They will then be saved and you will no longer need to modify them.

To do this, on the main screen click on the button "Pilots"

For the first race it is not necessary to create a customized car. As much to pass to the serious things right away!

After creating the drivers, click « **Grand Prix** » to open the race setting screen

## Race Settings

You are now on the race setting screen.

If it is your first race it is necessary to create the teams. If this is not the first race, then the teams will be the same as for the previous race.

Button to add or remove  
team / pilots for the race

The screenshot shows the 'GÉNÉRAL' settings screen for 'EASY SLOT RACE MANAGEMENT 2.0.0.8'. The interface is dark-themed with a grid of settings. A blue callout box points to the 'TEAMS' field, which contains the value '1'. The 'GO' button is at the bottom.

PILOTS/TEAM		FUEL MANAGEMENT	
TEAMS	1	TIRES MANAGEMENT	Both
RACE DURATION	texte	DAMAGES	Random and Track/God
RACE LAP COUNT	30	DAMAGES FREQUENCY	Rare
RELAY DURATION		SHOW CAR PICTURE	Enabled
RACE END TYPE	Standard	SHOW PILOT PICTURE	Enabled
LAPS BETWEEN PITSTOP	15	AVG LAPCOUNT BY TIRES SET	15
MANUAL REFUEL	True	WEATHER USE	False

GO

## Creation of teams

Click on the "Teams" button, you are on the team settings screen for the race.

In this screen you can add or remove teams. The left hand side shows the teams involved.

The right hand side shows the parameters of the selected team.

Button to add team to race

Remove team from race

Click on color too change team color

Click on Select Car to choose a custom car

IMPORTANT : Lane ID of the team

IMPORTANT : Clic on Affect Car ID to program the car to be used on the good lane id. Only one car on the track at once !

Clic on Pilot Image to select a recorded Custom pilot

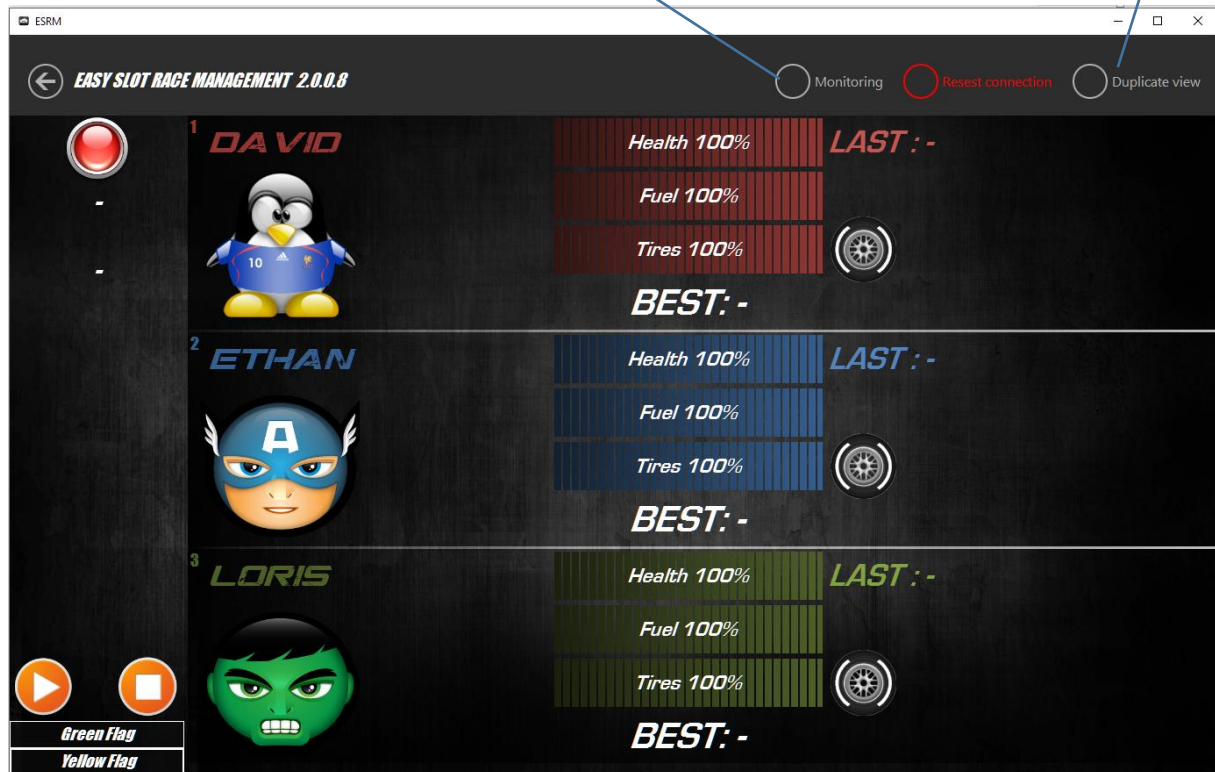

Once all the teams have been created, you have to go back to the race settings screen.

For the first race, it is preferable to activate only a part of the options to familiarize yourself with the system. For example, use fuel management but without damage, without tires and without random weather.

Now go to race !

Show monitoring screen to  
manage pilots settings

Duplicate view to have a  
second view for other  
monitor

Click on Pilot Image  
to select a recorded  
Custom pilot

Control panels for:  
Start the race,  
pause, stop the race  
Put a yellow or  
green flags.
